

INTERNET SOLUTIONS

E-Commerce Products

United Merchant Solutions is able to offer online commerce solutions supported by Vital Processing Services across one of the fastest and most reliable networks worldwide. We provide customized processing solutions from a variety of service providers (ISP/CSPS) that are VirtualNet certified.

E-Solutions – United Merchant Solutions takes great pride in providing powerful e-commerce solutions that are flexible, scalable and easy-to-use. Whether you are a retailer looking to set up an online store and shopping cart, or a manufacturer looking for ways to minimize your distribution chain problems, United Merchant Solutions has a solution for you.

VeriSign Solutions – We provide secure, reliable, and affordable, VeriSign's credit card, debit card, purchase card, and electronic check processing services.

Transaction Reports – We provide online access to daily activity reports, deposit reports, monthly statements, and more. You can view transaction information from your captured and cleared batches and, if desired, drill down and view extensive detail on each transaction.

Full Selection of Payment Solutions: We offer merchants a wide range of payment solutions, including traditional dial terminals, voice authorization & capture, and the latest in PC and internet-based products.

AVS: Address Verification Service (AVS) is a fraud prevention tool to help merchants who accept non face-to-face transactions better evaluate their level of risk when shipping products or providing services. When an authorization request is processed with AVS enabled, the numerical portion of the cardholder's address, along with the 5 or 9 digit zip codes, is sent along with the transaction data and compared with the same information on file at the cardholder's issuing bank.
